

IEEE PHOTONICS TECHNOLOGY LETTERS is published semimonthly. Original contributions are welcomed which relate advances or state-of-the-art capabilities in the theory, design, fabrication, application, performance, packaging and reliability of: — Lasers and optical devices; including semiconductor and solid state lasers, detectors, integrated optics and optoelectronics, sensors, etc. — Fiber, cable and waveguide technologies; including materials, splicing, connectors, measurement techniques, etc. — Systems, subsystems, and new applications of quantum electronic devices; including system demonstrations, signal processing, performance characterization, etc.

All correspondence and communication must be directed to:
PTL Editorial Office
 IEEE/LEOS
 Attention: Sylvia Flores/Daphne Moses
 445 Hoes Lane, Piscataway, NJ 08854

For questions regarding manuscript submission, manuscript status, or any other PTL information, please contact:
 Tel: +1 732 562 3920, Fax: +1 732 981 1138
 E-Mail: ptlstaff@ieee.org, ptlassis@ieee.org

INFORMATION FOR AUTHORS

IEEE PHOTONICS TECHNOLOGY LETTERS is published semimonthly with the purpose of providing rapid publication of original and significant contributions relating to photonic-lightwave components and applications, laser physics and systems, and laser-electrooptic technology. Online publication time will be two months from the end of the month in which the contribution is accepted, provided the author responds immediately to all communications. Galley proofs will be posted online at a secure site, but in the interest of fast publication, there may not be time to wait for their return. Lengths of the letters (including title, abstract, and references) may be no more than three printed pages. Please submit manuscripts only to the IEEE/LEOS Editorial Office via <http://mc.manuscriptcentral.com/ptl-ieee>. To ensure rapid communication, authors should include full mailing address, telephone and fax numbers; an e-mail address must be provided. Submission of a manuscript amounts to assurance that it has received proper clearance from the author's company or institution, that it has not been copyrighted, published, or accepted for publication elsewhere, that it is not currently being considered for publication elsewhere, and that it will not be submitted elsewhere while under consideration.

Manuscripts: The electronic file of the manuscript must be submitted, complete with all illustrations. The manuscript must include an abstract limited to about 100 words. The abstract should cover four points: statement of problem, assumptions and methods of solutions, results and conclusion or discussion of the importance of the results. The three printed page limit permits about 2500 words of text in addition to the title, abstract, and references. The amount of text will be reduced by allowance for equations, tables and figures. An average one-column figure with its caption will displace about 220 words of text. A submission containing the equivalent of more than three pages will be returned for shortening immediately and will not be given an official received date. The manuscript can be double spaced or in double-column format using an IEEE template for a 22 × 28 cm (8-1/2 × 11 in) sheet. Computer notation, such as Fortran notation for formulas, powers of ten, etc. (e.g., x**2, 1.E-10), is not acceptable and will result in automatic rejection of the manuscript. Number all pages, including figures (which should be grouped at the end), in a single series, with no omitted numbers. The style for references, abbreviations, etc., should follow the standard IEEE format. For information on preparing a manuscript, please refer to the "Tools for Authors" webpage at the following URL: <http://www.ieee.org/organizations/pubs/transactions/information.htm>. Prospective authors are urged to read this and follow its recommendations on the organization of their paper. References and captions should each be started on a separate sheet of paper, and must be double-spaced. References require a complete title, a complete author list, and first and last pages cited for each entry. All references should be to archived material such as journal articles, books, and conference proceedings. Web pages should not be referenced, since their content and accessibility may change over time. Figure captions should be sufficiently clear so that the figures can be understood without detailed reference to the accompanying text. Do not include captions on the figures themselves. Lettering and details should be large enough to be readily legible when the drawing is reduced to one-column width—as much as 4:1 reduction from the original. Axes of graphs should have self-explanatory labels, not just symbols (e.g., Electric Field rather than E). Photographs should be used sparingly, and must be glossy prints or electronic files (.tif, .eps, or .ps). Direct copies of instrument screens are not acceptable.

Indexing keywords are now mandatory and must be included with all manuscripts published in the LEOS journals. Please choose approximately five to eight keywords from the current IEEE Indexing List (available by e-mailing: keywords@ieee.org) which describe the major points or topics covered in your article. Please provide keywords with your submission.

Page Charges: After a manuscript has been accepted for publication, the author's company or institution will be requested to pay a charge of \$110 per printed page to cover part of the cost of publication. Page charges for IEEE PHOTONICS TECHNOLOGY LETTERS, like those for journals of other professional societies, are not obligatory, nor is their payment a prerequisite for publication. The author will receive 100 free reprints without covers if the charge is honored.

Color Art Charges: There is no charge for printing figures in black and white. Production costs associated with color printing are \$1045 for setup plus \$125 per figure thereafter. Authors may choose to pay for color printing in the Journal or avoid such charges by converting their figures to grayscale. The Journal also offers authors the option of publishing figures in black and white in the printed edition while displaying color versions online at IEEE Xplore™ at no additional cost. Upon acceptance of the manuscript, the corresponding author must inform Sylvia Flores at the **PTL Editorial Office** (s.j.flores@ieee.org) of the decision regarding publication of color figures in print and/or online. Staff will process all color figures for free online display in color unless directed otherwise by the author. The author must submit figure files in the appropriate format and resolution.

Copyright: It is the policy of the IEEE to own the copyright to the technical contribution it publishes on behalf of the IEEE, its authors, and their employers, and to facilitate the appropriate reuse of this material by others. To comply with the U.S. Copyright Law, authors are required to sign an IEEE copyright transfer form before publication. This form returns to authors and their employers full rights to reuse their material for their own purposes. Authors must submit the signed copyright form with their manuscript. The form is available online at <http://www.ieee.org/about/documentation/copyright/cfrmlink.htm>.

Electronic Form: The IEEE requires that you submit electronic files containing your accepted paper to Sylvia Flores at s.j.flores@ieee.org. These files should be sent by e-mail. Please send text and figures in Word, TeX and LaTeX. Figures may also be sent as .eps, .ps, or .tif files. **Complete information for submitting text and graphics electronically can be found at <http://www.ieee.org/pubs/authors.html>.** Please use the following guidelines:

1) Adhere to the accepted style of IEEE PHOTONICS TECHNOLOGY LETTERS as much as possible. While the list of processing programs acceptable to IEEE electronic production is almost endless, there are preferred programs that, when used, enable the preservation of the greatest amounts of information. TeX and LaTeX are preferred. An IEEE LaTeX style file, *IEEEtran.sty*, is obtainable by authors who e-mail a request to help@ep.ieee.org. The following points are important to remember when submitting electronic manuscripts (compuscripts) in TeX or LaTeX. 1) Include all macros (def) that are required to produce your document. 2) IEEE style dictates a 21-pica (3.5-in) column width. If mathematical phrases are produced with this in mind, they are apt to appear aesthetically pleasing in the final version.

If in doubt, do not hesitate to inquire using trans@ieee.org.
Upon acceptance of manuscript send the following to the PTL Editorial Office: 1) any original material such as ink drawings and/or glossy photographs of the figures, 2) references which must include full titles and first and last page numbers of articles, 3) the completed copyright release form, 4) electronic files of the entire letter, and 5) complete contact information for all authors. Indexing keywords are mandatory and must be included on all manuscripts published in the LEOS journals. Please choose approximately five to eight keywords from the current IEEE Indexing List (available by e-mailing: keywords@ieee.org) which describe the major points or topics covered in your letter. **Complete information for submitting text and graphics electronically can be found at <http://www.ieee.org/pubs/authors.html>.**
